Repository Citation

Risk Editorial Board, *Table of Contents Volume 10, Number Four, Fall 1999*, 10 RISK [ix] (1999).

This Prefatory Matter is brought to you for free and open access by the University of New Hampshire – School of Law at University of New Hampshire Scholars' Repository. It has been accepted for inclusion in RISK: Health, Safety & Environment (1990-2002) by an authorized editor of University of New Hampshire Scholars' Repository. For more information, please contact ellen.phillips@law.unh.edu.

RISK

Health, Safety & Environment

Volume 10

1999

Number 4

Articles

Linda-Jo Schierow, *Pesticide Residue Regulation: Analysis of Food Quality Protection Act Implementation*

Dr. Schierow discusses the effects of a recent statute on food safety.

281

John P. Tiefenbacher & William Solecki, *Pollution Prevention: Factors Behind Toxic Release Reduction in the U.S. Paper Industry*

Drs. Tiefenbacher and Solecki analyze the factors associated with, and influential in, the reduction of toxic releases in the U.S. paper industry.

289

Fred Kuchler, Jacqueline L. Teague, Richard A. Williams & Don W. Anderson, *Health Transfers: An Application of Health-Health Analysis to Assess Food Safety Regulations*

The authors apply a Health-Health Analysis to risks associated with harvesting Gulf oysters to evaluate that approach to managing health and safety risks.

315

James Flynn & Paul Slovic, *Expert and Public Evaluations of Technological Risks: Searching for Common Ground*

Drs. Flynn and Slovic compare and evaluate the ways in which the public and experts perceive technological risks.

333

Paul J. Ossenbruggen, *The Impacts of Using a Safety Compliance Standard in Highway Design*

Dr. Ossenbruggen introduces an algorithmic method to objectively test and evaluate safety in the highway design process.

359

Forthcoming

- Newspaper Coverage of Nuclear and Chemical Weapons Sites
- Managing Risks in Residency Training Programs
- Perceived Credibility Among Savannah River Stakeholders
- An Evaluation of Chemical Hormesis Studies
- Regulating Biotechnical Risk at the EPA
- EPA's Indoor Air Quality Personal Computer Model
- The Precautionary Principle in Australia
